

## Grandinote Server, Integrated Amplifier, and Speakers, Nordost Cabling

Robert Schryer | Oct 18, 2019

My journalistic objectivity be darned! The Goerner Audio/Grandinote room produced the sort of sound that melts my heart, ravishes my senses, and reminds me of why great hi-fi is worth the money.

Was I in a hotel room? Couldn't tell, because the sound coming from a pair of Grandinote Mach 9 speakers with carbon fiber enclosures (\$CAD50,000/pair), a Grandinote 37Wpc Shinai integrated amp (\$CAD20,000), and a Grandinote Volta music server (\$CAD14,000), with cabling by Nordost, completely obliterated the walls around me. I was somewhere else. But I think what surprised me most about the system's sound was the fact there wasn't a single tube in the signal path. The sound was so spacious, with such luscious tone.
