

## Grandinote

Massimiliano Magri of Grandinote from Italy put up a stellar sounding system. He debuted his new Grandinote Mach 9 loudspeaker (\$30,000/pair), with his new carbon fiber enclosures. It's a line source with a crossover-less design using nine woofers and sixteen tweeters. After many hours of research and listening he discovered the carbon fiber cabinet to be superior to the aluminum cabinets he had used before. The Grandinote Mach 9 was driven by a modest Shinai integrated amplifier, a Volta, streamer - DAC and a Celio, phono-stage.
